

## Infrared Camera [ FLIR i7 ]

The Flir i7 IR camera is extremely easy to use, small, and lightweight. The 120 x 120 resolution meets all the requirements of RESNET insulation inspection standards, and allows for rapid assessment of insulation defects and moisture problems. When used in conjunction with a Blower Door, or by itself, it is a powerful tool for conveying information to clients in vivid detail.

1 DAY	2 DAY	1 WK.	1 MO.
\$95	\$160	\$310	\$500

## Blower Door / Manometer [ Retrotec Q 46 ]

Door Fan System with Automatic Control – includes fan, gauge, and door. The Q46 is a commercial quality automated blower-door. Use for super tight to super leaky houses, small commercial buildings or enclosures with 9 sf (0.8 sm) of leakage or less.

1 DAY	2 DAY	1 WK.	1 MO.
\$100	\$175	\$320	\$550

## Duct Blaster / Manometer [ Retrotec Q 32 ]

The Retrotec Duc-Tester is designed specifically to measure residential duct leakage. It can be used to locate duct leaks and measure the results of duct sealing. It is an essential instrument to demonstrate Compliance with Boulder County BuildSmart.

BGBG Members receive a \$100 discount on Skycastle Rentals memberships

## EQUIPMENT USE TRAINING

Prior to your acceptance of the rental equipment, Ron Flax will review basic use of the rented equipment with you. If you are interested in more expert level training on the equipment and software please consider the Basic Membership with 1/2 hour support and 2 hour training or the Pro Membership with 1 hour support and 4 hour training.

## WORKSHOPS & CLASSES

We periodically offer Residential Green Building 101 workshops. Please visit the BGBG for more information. If you are interested on being on future mailing notifications of upcoming classes or would like to arrange a class for your organization please email Ron Flax with that in the subject line. We can also put together custom presentation on any green building topic that might be of interest to your group.
